

# Facility Operation in Cold Climates

Tuesday, February 26, 2008  
Ramada Inn, Lewiston, ME  
8:30 a.m. – 3:30 p.m. (Sign-in begins at 8:00 a.m.)

There are many challenges to consider when operating a water or wastewater facility in climates where ice, cold, and extreme winter weather come with the territory. The key is to be ready ahead of time, and not wait until disaster strikes. By taking the proper steps, you'll never have to say "If only I knew then what I know now..."

This interactive session will broaden your perspective on preparedness and preventive maintenance measures with tips on managing your operation during a "big chill." Experts in the field will explain what they've learned from mishaps experienced or averted. We will discuss snowmaking as a method of effluent disposal, and will emphasize less well-known safety issues that should be considered. Learn how to protect your facility, your infrastructure, and yourself through foresight, common sense and creative thinking.
