

Mapping for O & M, Capital Improvements & GIS

Tuesday, March 25, 2008
LaFleurs Restaurant, Jay, ME
8:30 a.m. - 3:30 p.m. (Sign-in begins at 8:00 a.m.)

Many factors are prompting water and wastewater facilities to more thoroughly map, log, and archive the configuration of their piping systems, manholes, and equipment they use every day. Some of the motivating factors are insurance requirements, maintenance needs, construction planning, asset management, CMOM and GASPE 34. Regardless of the reason, it makes sense to know what you have for resources, where they are located, and what they require in terms of ongoing and long term maintenance.

This session will use a wastewater collection system to illustrate the steps and resources available to help map your assets. We will discuss aerial photography, a local case study, digitizing existing maps, GIS, software programs, and budgeting.

Presenters: Stephen Broadbent & Justin Richardson, Wright Pierce Engineers; Ed MacDonald, Maine Municipal Association; Mark Holt, Jay Sewer District; Matt Timberlake, Ted Berry Company and Patrick Graham, J.W. Sewall Associates
