

Math Review

Tuesday, April 15, 2008
Yarmouth Town Hall, Yarmouth ME
8:30 a.m. – 3:30 p.m. (Sign-in begins at 8:00 a.m.)

This step-by-step review of basic math principles is designed to give individuals a foundation for using mathematical calculations in a variety of water and wastewater facility operations.

Through review and one-on-one exercises, the class identifies the calculations and conversions required to solve math problems both for daily application and in preparation for Maine's Operator Exams. Attendees will work in small groups to solve grade specific math problems. The presenters will also share problem-solving techniques to assist you in overcoming some of the blocks to deciphering math problems. A workbook with questions and answers will be provided.

This class should help participants better understand the mathematical equations pertinent to specific processes in water and wastewater plants.
